ENJO
by acekare

Meet the userfriendly attendant controlled drive unit, giving the care taker more freedom to move with less effort.

Enjo is a feather light yet powerful drive unit. Weighing just 4 kg, it lets you transform your wheelchair in the blink of an eye, without the slightest physical effort. Simply clip the motor to the drawbar and off you go! This is a major advantage, particularly for rehabilitation centers, hospitals, retirement homes and cultural venues. They can easily install the brackets on their different types of wheelchair and transfer the motorization from one chair to another in a matter of seconds, offering great flexibility of use.

With Enjo's central position of the wheelchair axis, it will give the care taker perfekt ergonomic position ensuring a healthy work environment. It also enables friction free movement and total maneuverability when Enjo is turned off.

Specifications

Total weight (incl. mounting kit, control, and charger)	5,1 kg
Weight Enjo (incl. battery)	4 kg
Max. user weight	150 kg
Battery	24V 7Ah lithium-ion
Motoreffekt	250W
Speed	0-6 km/h
Range	ca. 23 km
Max. gradient	6°
Operationg temperature	-25°C to +50°C
Control	Attendant control
Charging time	Ca. 2-3 h
Warranty	2 year
CE marking	MDR 2017/745, class 1

Discover the Advantages of Enjo Motorisation

Enjo motorisation transforms a manual wheelchair into a modern, versatile mobility solution, giving users the freedom to move with less effort and greater independence. Designed with both comfort and practicality in mind, Enjo offers a seamless blend of manual and powered mobility. Whether you want the exercise and flexibility of manual use or the extra support of motorised assistance, Enjo ensures you always have the right option for your needs.

One of the key advantages is customisable support. The intelligent power assistance helps you manage slopes, longer distances, or challenging surfaces without overexertion, reducing strain on the arms and shoulders. This makes everyday activities such as shopping, commuting, or traveling much more accessible. At the same time, you retain the ability to propel the wheelchair manually whenever you wish.

Enjo motorisation also delivers safety and control. With responsive handling, smooth acceleration, and precise braking, you can move confidently in a wide range of environments. Its compact and discreet design means it integrates perfectly with your wheelchair, without compromising on style or manoeuvrability.

Another great advantage is flexibility. The motorisation can easily be disengaged, allowing the chair to function like a regular manual wheelchair when power assistance is not needed. This dual function makes Enjo an ideal choice for those who want both independence and support in one solution.

Finally, Enjo brings freedom and peace of mind. You can go further, manage your energy better, and stay active without being limited by physical strain. For users, families, and caregivers, this means more opportunities to participate fully in everyday life.

With Enjo motorisation, the balance between manual and powered mobility is no longer a choice, it's a smooth, adaptable experience that empowers you to live life on your terms.
